'FELLSILENT' is a name that has been whispered and revered by influential members of the International Metal community for quite some time now.

Three years of perfecting their sound, combined with UK tours with the likes of Enter Shikari and Devil Sold His Soul have helped cement their place as one of the UK's most talked about Metal bands... You know, one of those – *"When these guys drop their debut album, it will be MASSIVE"* kind of deals.

So, this may well be one of the shortest press releases you are ever likely to read...
Because THIS is that album.
